DATE: October 22, 2020
TO: Patterson Irrigation District Landowners / Water Users
FROM: Vince Lucchesi, PE, General Manager
SUBJECT: 2020-21 Winter Operations

Dear Water Users of the Patterson Irrigation District,

As the District rolls into the winter months and irrigation demand drops, District operations also go into maintenance mode. During this period, the District will be making water available on a limited basis and "bunch up" the orders to accommodate the winter maintenance activities of the District. Please plan accordingly and request water as far in advance as possible so District staff can make accommodations. In the event of a dry winter and operational changes are required, adjustments to this schedule may occur. The following is the planned and scheduled shut down dates for winter 2020/21.

1. On November 18, ditch tenders will no longer be taking new water orders with the intent to shut all water deliveries off by 4 PM on November 21. The District's distribution system will be down from November 22 through December 7. The District will commence with limited water deliveries after December 7th, but water will be made available around District maintenance activities.
2. Water will not be made available during the period of December 19th through January 4th to accommodate the holidays. The District will commence with limited water deliveries after January 4th, but water will be made available around District maintenance activities.
3. The final winter shutdown will occur during the period January 18 through January 28 to perform maintenance and inspections on the Main Canal.

Kindest Regards,

A handwritten signature in blue ink, appearing to be "Vince Lucchesi", is written over a horizontal line.

Vince Lucchesi, PE
General Manager
