Re: End of 2023 Water Season

Dear Water User,

On August 16, 2023, the Board of Directors of the Patterson Irrigation District (PID or District) voted to end the 2023 irrigation season and District deliveries on October 20, 2023.

As the District rolls into the winter months and irrigation demand drops, Patterson Irrigation District (PID or District) operations will also go into maintenance mode. During this period, the District will be making water available on a limited basis and "bunch up" the orders to accommodate the winter maintenance activities of the District. Water will be made available during these bunched periods only Monday-Friday.

District deliveries leading up to October 20th will be reduced with the intention to shut orders off that afternoon. The goal would be to modify deliveries to make water available the following Monday-Friday to aid with staffing for the maintenance season. The final determination on the shut down will be based upon the demand leading up to October 20th.

Please note, during the maintenance season, laterals throughout the District will be periodically shut down for maintenance activities and water will not be available. Again, please plan your irrigations with the District in advance, in the event we are maintaining a lateral and cannot get you water.

Please plan accordingly and request water as far in advance as possible so District staff can make accommodations. In the event of a dry winter and operational changes are required, adjustments to the schedule may occur. Thank you for your continued efforts to use water efficiently and conserve in 2023.

Kindest Regards,

A handwritten signature in blue ink, appearing to be "Vince Lucchesi", written over a horizontal line.

Vince Lucchesi, PE
