DATE: October 31, 2019
TO: Patterson Irrigation District Landowners / Water Users
FROM: Vince Lucchesi, PE, General Manager
SUBJECT: 2019-20 Winter Operations

Dear Water Users of the Patterson Irrigation District,

As the District rolls into the winter months and irrigation demand drops, District operations also go into maintenance mode. Due to the late rains and colder weather that went into 2019, winter operations are starting later due to higher demand for irrigation water into late October and early November. With the District going into maintenance mode, the District will be making water available on a limited basis. Please plan accordingly and request water as far in advance as possible so the District can make accommodations. Water orders will be "bunched" up to accommodate the winter maintenance activities of the District.

On November 18 through December 1, the District will cease grower deliveries to get started on maintenance. The District will commence with limited water deliveries after December 2nd but water will be made available around District maintenance activities.

The District will also not make water available during the period of December 20 through January 5 to accommodate the holidays and January 18 through January 27 to perform maintenance and inspections on the Main Canal.

Kindest Regards,

A handwritten signature in blue ink, appearing to be "Vince Lucchesi", written in a cursive style.

Vince Lucchesi, PE
